

Bhaskar Lamba

Backend Engineer — APIs, Distributed Systems & Production AI Agents

+91 9306505417 | bhaskarlamba@gmail.com | linkedin.com/in/bhaskar-lamba-5268391b2

EDUCATION

IIT Kanpur

GPA 8.1/10

Bachelor of Technology, Mechanical Engineering

WORK EXPERIENCE

Senior Software Applications Engineer

Aug'24 – Present

Oracle India Pvt. Ltd.

- Own backend architecture and **API** design for two enterprise-scale talent management products — **Succession Management** and **Talent Review** — serving **400+ business customers**, with direct responsibility for production reliability.
- Independently scoped and delivered **30+ backend features** end-to-end, consistently meeting delivery timelines as short as **3–4 days**, while mentoring engineers through code reviews and design discussions across a **5-member** team.
- Designed, built, and shipped a customer-facing **AI agent** for Succession Management — an agentic system in production, not a prompt wrapper: natural-language workflows (succession plan creation, status queries, criticality analysis) backed by a custom tool-calling API layer.
- Building a second production **AI agent**, Talent Review Analyst: architected the tool-use loop and error-handling strategy for chat-driven retrieval, summarization, and prioritization over talent-review data, with graceful fallback for unsupported/ambiguous queries.

Applications Engineer

Jun'22 – Aug'24

Oracle India Pvt. Ltd.

- Contributed to feature development across **Succession Management** and **Talent Review** enterprise products, building **REST APIs** and UI components as part of a cross-functional team.
- Evolved **~90%** of the product's backend boundaries, migrating it from a legacy Java-based system to a modern, modular web architecture.

Project Intern

Jun'21 – Jul'21

Oracle India Pvt. Ltd.

- Designed conversation flows within a **chatbot** and integrated **REST APIs** to retrieve and serve data in real time, managing the project end-to-end within a four-week timeline.
- Recognized for outstanding performance with a **Pre-Placement Offer from Oracle**.

PROJECTS

DistriKV — Distributed Key-Value Store

[GitHub](#)

Go, Docker

- Built a thread-safe, replicated key-value store in **Go** — leader-follower architecture, synchronous replication over HTTP/JSON with per-follower timeout — verified race-free under **go test -race** with concurrent load.
- Containerized a **3-node cluster** with Docker Compose; chaos-tested failure behavior via **docker stop**, uncovering and documenting a DNS-resolution failure mode and a full-data-loss-on-restart limitation.
- Documented the consistency/availability trade-offs and a production hardening path (Raft-based leader election, WAL-based crash recovery, key-hash sharding).

My Cricket Heroes

Web Application

Apr'23 – Jun'23

- Collaborated in a team of five to conceptualize and develop the **MyHeroes** application, mirroring platforms like **Dream11**, integrating live scores and player statistics for real-time updates during **IPL'23**.
- Achieved a **75% increase** in user engagement during IPL'23 through live score and player information integration.

TECHNICAL SKILLS

Languages: Java, Go, C, C++, JavaScript, Python, Dart

Backend & Distributed Systems: REST APIs, Spring Boot, Node.js, MySQL, Leader-Follower Replication, Concurrency (goroutines, mutexes)

AI & Agentic Systems: Oracle AI Studio, Agentic/LLM Systems, Tool-Use & Function-Calling, Prompt Design

Tools: Docker, Git, Postman, Android Studio

ACHIEVEMENTS

- Secured **AIR-1558** in JEE (Advanced) 2018 among approx. 2 lakh candidates.
- Won IIT Kanpur's **Outstanding Freshman Award** for exceptional performance, given to only **2 students** from the batch.
- Awarded **Institute Silver Medal** for achieving a Gold Medal and breaking the meet record in the Inter-IIT Sports Meet.
- Received **Sports Scholarship** from the Games and Sports Council, IIT Kanpur for two consecutive years.
